DETAILED ACTION

1. The Preliminary Amendment filed on October 23, 2003 is acknowledged.
2. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1,6,7,11, and 12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1,6,7,11, and 12 of U.S. Patent No. 6,683,575. Although the conflicting claims are not identical, they are not patentably distinct from each other because the omission of an element and its function in a combination is an obvious expedient if the remaining elements perform the same function as before. *In re Karlson* 136 USPQ 184 (CCPA 1963). Claims 1,6,7,11 and 12 which eliminate elements (a series-resonance frequency of the first, second, and fourth linear antenna elements, a parallel-resonance frequency of the second, third, and

Art Unit: 2821

fourth linear antenna elements ...) and their function with the remaining elements functioning as before, are therefore merely an obvious variation of claims 1,6,7,11 and 12 of US Patent No. 6,683,575.
